AmideBio to present at 24th Annual Colorado Capital Conference on October 9, 2012

Boulder, CO October 4, 2012 – AmideBio, LLC announced today that Dr. Michael Stowell, Chief Technology Officer of AmideBio, will be presenting at The 24th Annual Colorado Capital Conference in Denver:

“Improved Insulin for the Treatment of Diabetes”

Rockies Venture Club received 60 applications from companies across Colorado and the US to pitch at the 2012 Colorado Capital Conference in Denver, taking place on October 8th and 9th. After a rigorous screening process, AmideBio, LLC was included in the top 14 startups who will pitch to investors at the conference.

About AmideBio, LLC

AmideBio based in Boulder, CO is a biotechnology company focused on providing recombinant peptide research and clinical products for a diverse array of disease research and disease targets. AmideBio maintains a proprietary platform vector technology that addresses the challenges of historically difficult to manufacture peptides by providing products that are reliable (BioPure™), economical and incorporate environmentally sustainable practices.
